

Mstfa Baban

Experienced Front-end Web Developer, dedicated to creating elegant, user-friendly and efficient applications. Fluent in English, Arabic, and Kurdish(Sorani) And basic proficiency in German(A2).

Relevant Experience

Fullstack Developer · **Freelance** 2024 - Present

- Developed '[Kartei](#)' an open-source flashcard app, using Ionic Vue across all platforms to help with my German language learning. Designed and built this engaging educational tool to meet personal needs, ensuring cross-platform compatibility and ease of use while promoting vocabulary retention through interactive flashcard exercises.
- Implemented a liveness detection feature for facial recognition in an existing application as a freelance developer, using CompreFace. Enhanced security and user verification by integrating this biometric technology, ensuring accurate identification while preventing spoofing attempts by employees.
- Created several custom CRUD apps for business management

Front-end Developer · **Moonline** 2021 - 2024

- First day on the job, researched the API docs we were using and found out we can cut 9+ seconds on SAP searching query with 2 simple changes on the query
- Surveyed SAP developers in order to create a custom form building solution using Vue and Strapi.
- Conducted testing with the operation team to ensure the solution was reliable and efficient.
- Provided documentation and training to the development team to enable them to create custom forms using the new solution.
- Debugged and resolved issues in the legacy code, while ensuring backward compatibility with the existing system.
- Designed and developed component-based Vue.js applications optimized for mobile use with a focus on smooth, efficient user experience.
- Employed Server-Side Rendering (SSR) techniques to optimize website performance and SEO.

Front-end Developer · **Plus The Edge** 2019 - 2021

- Designed and developed frontends for various applications, including Hospital, Warehouse, and Restaurant Management Systems, as well as restaurant food ordering applications with PayPal integration

Internship · **Rozhi Spi** 2018

- developed the user-friendly frontend and implemented essential backend features for an accounting application. Created financial data management by making efficient modules for transaction tracking, financial reporting, and user authentication, fulfilling all specified requirements.
